

NETWORK SERVICES

WIRELESS MANAGEMENT

AffinIT specializes in managing authorized access and wireless access points, which enhance business operations and support cost-effective remote work. As reliance on these networks grows, effective management is vital for optimizing performance, security, and scalability.

Effective wireless management is vital for building a robust network of routers, access points, and devices. It encompasses performance monitoring, configuration, security, and troubleshooting, all working together to create a seamless experience. By embracing this approach, businesses can cut down on cabling costs, support remote work, and supercharge productivity. Plus, it enhances connectivity, safeguards data, and boosts cost efficiency.

Wondering if your business could benefit from Wireless Management?

Optimizing your network involves key factors like performance, coverage, scalability, security, traffic management, and monitoring. Outsourcing expertise helps businesses address IT resource constraints, enhance security in BYOD environments, and support remote work while achieving cost efficiency. This approach frees IT staff from daily tasks, secures devices, and lowers downtime and maintenance costs.

Tired of slow, unreliable Wi-Fi? AffinIT's wireless management services provide fast, secure connectivity for your business, featuring proactive monitoring, enhanced security, and optimized performance for all devices. **Contact us for a free wireless network assessment to see the performance difference!**

AFFINIT OFFERS TRUSTED RELATIONSHIPS, EXPERT KNOWLEDGE, COST SAVINGS, AND ADVANCED TECHNOLOGIES:

Site Surveys & Capacity Planning

Centralized AP (Access Point) Management

Guest Network Segmentation

Performance Analytics, Alerts & Notifications

Seamless Roaming, Load Balancing & Bandwidth Optimization

Device Authentication & Tracking

Support for Multi-site Deployments

Cloud-based Control Panels

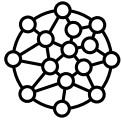

Backup and Redundancy

Usage & Predictive Analytics

609-469-6633

WIRELESS MANAGEMENT

HOW WILL YOU BENEFIT?

Improve Network Performance: Our tools enhance network performance by optimizing Wi-Fi coverage and balancing user traffic across access points, preventing overload and ensuring a smooth user experience.

Support Remote Access & Management: Cloud-based management platforms allow remote monitoring and troubleshooting of networks, enabling IT teams and service providers to quickly resolve issues and reduce downtime without on-site interventions.

Improve User Experience: Seamless roaming improves connectivity and boosts productivity as users switch between access points. Centralized management tools simplify troubleshooting and minimize downtime and frustration, which is essential for enhancing operational efficiency and customer satisfaction.

Simplify Network Management: A centralized interface enhances network management by automating routine tasks like firmware updates and security patching, which saves time, reduces errors, and improves overall performance and reliability.

Enhance Business Continuity: A resilient network design, along with effective wireless management, facilitates the implementation of redundancy and backup systems, greatly improving network reliability and performance.

Enhance Security: Enhancing business security involves enforcing encryption, implementing firewalls, and establishing access controls for connected devices. Advanced threat detection and guest network segmentation help organizations protect their networks and manage devices more efficiently.

BUNDLED IT SERVICES TAILORED TO YOUR NEEDS

We've taken the hard work out of knowing what's right for your company. Our comprehensive suite of IT solutions, all with a focus on cyber security, are grouped into three key areas:

USER SERVICES

- Email Security
- Security Awareness Training
- Endpoint Backup
- Remote Help Desk

DEVICE SERVICES

- Patch Management
- Managed Detection & Response
- Endpoint Encryption
- On-Site Help Desk Dispatch

NETWORK SERVICES

- Server Management
- LAN Management
- Wireless Management
- Firewall Management
- WAN Management
